

Photograph & Audio / Video Recordings Policy

Photographs and audio / video recordings are periodically taken of people participating in library programs and activities. All persons attending library programs and activities or using library facilities, thereby agree that any photograph and audio/video recording may be used by the library for promotional purposes, including its electronic media, websites, brochures, flyers, social media channels and other publications, without additional prior notice or permission and without compensation to the participant.

In the event a program participant and/or library patron does not wish to be included in library promotional materials, the participant or patron must notify the library in writing in advance of the program, activity or library visit, and the library will make best efforts not to include the participant in audio/video recordings.
